

## **ODYSSEY, A STORYTELLING TOOL.**

Jacobo Carbó '17

Prof. Spezialetti

From photo albums to social media platforms, people try to find tools that allow them to remember and share their life experiences. Everybody has a story to tell but there is no software that allows its users to tell their life stories as they should be told. That is where Odyssey comes in. Odyssey is a web application developed in Django and ReactJS that enables its users to create, edit and share a map based representation of their journeys or life experiences.
