

Title: **TRYCODE**

Author: Christine Boyle, 2015

Trinity Faculty Sponsor: Ralph Morelli

Abstract:

TryCode is a web application designed for high school students who have an interest in Computer Science, connecting with others, and creative exploration. Users of the site are able to create a profile, upload a coding project, view others' coding projects, send and receive feedback/bug reports, and update their code. Additionally, users of the site have access to help forums where they can post questions and answers on a variety of computer science related topics. Finally, female students have the option of joining the TryCode Women's Mentoring Network where they are able to contact a mentor who can provide guidance and support throughout their studies and early career.
