INTRODUCTION:
• There is a lack of efficient ways to prepare for music exams.
• The Composition Identification Quizzer (CIQ) solves this problem by providing a seamless, self testing method, to aid users in their preparations.

HOW IT WORKS (Abstract):
• Users upload mp3 files via the CIQ web portal.
• Mp3 files are then streamed to users’ devices via the CIQ mobile app, which plays them as random snippets for exam simulation purposes.
• Then, users must identify the compositions based on the snippets, and their answers are compared to the original titles.

DEVELOPMENT:
• CIQ web portal – Ruby on Rails
• CIQ mobile app – Android Development Tools
