Young adult Americans have been identified as the population most responsible for recent changes in the nation's religious identification and patterns of religiosity. In order to better understand this trend the ARIS 2013 College Student Survey focuses on the student component of the millennial generation.

Part 1

Economic & Public Policy Findings
Sample Details

A national on-line survey conducted in April-May 2013 of the worldviews and opinions of 1710 students at 38 four-year private and public colleges and universities in 27 states.

59% of respondents were women and 28% were minorities.

Roughly equal numbers of freshmen, sophomores, juniors and seniors.

Majors - STEM 36%, Social & Behavioral sciences 30%, Arts & Humanities 29%, Undecided 5%.

Respondents’ Colleges by Region

South
Augusta State University
Berea College
Eastern Carolina University
Guilford College
Loyola University New Orleans
University of Alabama
University of Georgia
University of North Carolina
University of North Texas
University of Tennessee
Oklahoma State University
University of Arkansas

Northeast
Barnard College
Bridgewater University
Gettysburg College
Haverford College
New Jersey Institute of Technology
Penn State
Providence College
Rowan University
University of Massachusetts
University of Vermont
Wesleyan University
Yeshiva University

Midwest
Fort Hayes State University
Iowa State University
Notre Dame
Oberlin College
University of Chicago
University of Minnesota

West
Colorado College
Idaho State University
Pomona College
University of Arizona
University of Montana
University of Washington
Utah State University
Washington State
Methodology

The Worldviews and Opinions of American College Students National Survey questionnaire was emailed to addresses collected from the online directories of 38 colleges and universities in the United States during April-May 2013. The sampling frame was colleges stratified by Census Region and whether the institution was private (including sectarian) or public. Twelve of these institutions were located in the South, twelve were in the Northeast, eight were in the West and six were in the Midwest. Fourteen of these colleges and universities were private while the remaining twenty-four were public. It is important to note that the project could survey only students whose emails were in the public domain, and who did not withhold their contact information from their college directory as permitted by the Family Education Rights and Privacy Act, a federal law that protects the privacy of student educational records. In addition some state laws and institutional practices limit access to contact information and prevent a larger sample from being created. For example, the California Information Practice Act prohibits information from directories of state institution of universities from being “used, rented, distributed, or sold for commercial purposes,” thereby reducing the number of emails collected from the state. Many institutions also operate limited public access to their directories even when there is no legal requirement to do so. Furthermore, there are myriad colleges and universities whose student directories cannot be found by web searches.

In order to assure diversity the project also specifically searched for the top ten most common surnames for certain minority groups (African Americans, Hispanics, and Asians). A random sample of emails was taken from each university’s list. These random samples were used in four waves of emails sent to students asking for their participation in the survey. Every email address was assigned a unique online link to the survey.

The emails sent to students were all identical and stated that those who completed the survey would be entered into a sweepstake for the opportunity to win one of ten $50 gift cards. This was done to incentivize responses from recipients. One reminder was sent to each non-respondent. The survey was closed on June 7, 2013 with 1710 respondents.
Economic & Public Policy Findings

In your opinion, how do young people’s (ages 18-29) chances of establishing themselves economically and professionally in the U.S., compare with their parent’s generation?

Count

Response

- Much Better: 3.5%
- Somewhat Better: 16.1%
- The Same: 9.6%
- Somewhat Worse: 47.5%
- Much Worse: 19.1%
- Don’t Know: 4.3%

In your opinion, is the following statement true or untrue?

Count

Women must defend their reproductive rights.

- Very True: 53.0%
- Quite True: 26.0%
- Not so True: 8.2%
- Not at all True: 3.5%
- Don’t Know: 8.0%
In your opinion, is the following statement true or untrue?

Immigration threatens American jobs.

- 37.5% Not so True
- 30.7% Not at all True
- 16.6% Quite True
- 8.2% Very True
- 7.0% Don't Know

In your opinion, is the following statement true or untrue?

People with no college degree have little chance of succeeding in life in the United States today.

- 41.2% Quite True
- 32.7% Not So True
- 14.8% Very True
- 9.2% Not At All True
- 2.4% Not Sure
**Do you agree or disagree with the following statement?**

**Affirmative action in college admissions should be abolished.**
