Class Search

You can search the live version of the Schedule of Classes for up-to-date information as you are working with students.

To access this function, start on the Faculty Center page (or go to the Self Service page) and click on Class Search.

1. Select the appropriate term, subject and course number to find a particular course, or select Requirement Designation to find a course that will meet a specific General Education requirement.
2. You can also click on Additional Search Criteria for more search options such as particular meeting days or session (such as 1st or 2nd quarter).

3. The system defaults to search for only open classes, but you can uncheck that box to find all classes regardless of status.
