The Department of Chemistry at Trinity College invites applications for a full-time laboratory instructor, to join our vibrant and diverse faculty and students in the fall term of 2019. Candidates with at least a Master’s degree in Chemistry are preferred, though candidates with a B.A. or B.S. in Chemistry and significant teaching experience will be considered.

The successful candidate will have the opportunity to teach laboratory courses in both introductory and organic chemistry, develop and implement new experiments, and hire and train student teaching assistants. Additional activities include collaborating with the Chemistry Department faculty, ordering equipment and supplies, preparation and set-up for each experiment, routine maintenance of instrumentation used in the laboratories, grading of laboratory assignments, and editing of the laboratory manual. The department uses a guided-inquiry approach where student laboratory data plays a central role in student learning. We are seeking a candidate who is committed to helping students learn how to gather quality data and properly interpret it. For more information, see the Trinity Chemistry Department website.

The successfully hired candidate who also engages in research, either in chemistry or pedagogy, will be eligible for a Qualified Leave of Absence to pursue scholarly endeavors related to their position after six years of teaching and guaranteed annual funds toward conference travel. The successfully hired candidate will also have access to tuition benefits.

Trinity is a liberal arts college located in Connecticut’s capital city of Hartford. Our student body, in the College and in Chemistry, is diverse, representing 41 states and 70 countries with 21% students of color and 50% women. Trinity College is committed to building a representative and diverse faculty, staff, and student body. We place high value on an environment that offers equal opportunity in the workplace and encourages mutual respect, interaction, and engagement. We encourage applicants from diverse cultures, backgrounds and ethnicities reflective of our student body. Applicants with disabilities should request, in advance, any needed accommodation in order to participate in the application process.

Applications will be reviewed as they are received, with full consideration given to those received by March 15, 2019. Questions about the position can be addressed via email to Prof. Timothy Curran.

A complete application should include a CV, a 1-2 page statement on teaching philosophy and goals, official transcripts and contact information for three individuals who will provide letters of recommendation.
