Dear Members of the Class of 1967,

I hope you are all doing well. I am writing to express my sincere gratitude for your support through the Trinity College Class of 1967 Scholarship and to give you an update on my time at Trinity. Your generosity has been a meaningful part of my college experience, and I am very grateful for the opportunity it has given me.

This past fall, I had the opportunity to study abroad in Copenhagen, Denmark. Living in another country and traveling throughout Europe was an incredible experience, and it gave me the chance to experience a different culture while also becoming more independent. It was one of the highlights of my time at Trinity, and I am very glad that I took advantage of the opportunity to study abroad.

This past summer, I also had the opportunity to gain valuable professional experience through an internship at Access Health CT in Hartford. I worked primarily with small-group health insurance and the state's health insurance marketplace, gaining a better understanding of how businesses and employees navigate the health insurance system. I enjoyed the work enough that I am continuing with Access Health CT on a part-time basis during the fall semester.

Academically, I have continued to challenge myself at Trinity. In addition to my Economics major, I recently added a second major in Mathematics. This semester, I am taking Econometrics, Abstract Algebra, Spectral Graph Theory, and Food Chemistry. Outside of my classes, I work as a tutor in the Mathematics Department's Quantitative Center and serve as a teaching assistant for Economics 315, International Trade. I have also remained heavily involved in the Trinity Student Investment Fund, where I have continued developing my interest in finance and applying what I learn in the classroom to real-world companies and markets. Outside of academics, I am enjoying my senior year living in a house on Allen Place with ten roommates. It has been a fun and memorable way to spend my final year at Trinity, and I am trying to make the most of the time I have left with my friends and classmates.

As I look toward graduation, I am hoping to pursue a career that combines my interests in mathematics, economics, and finance. I would love to begin my career in a city such as Boston or New York, where I can continue learning and growing professionally. For now, my goal is to finish my senior year strong and take advantage of everything Trinity has to offer before graduation. Thank you again for your generosity and for investing in Trinity students like me. I am truly grateful for the support of the Class of 1967, and I look forward to hopefully attending the Class of 1967's 60th Reunion and having the opportunity to meet some of you in person.

Best,

Sean Boyle
