## What is StarCraft II?

Controlling one of 3 humanoid races, two players attempt to out-manuever one another on a 3D, simulated battlefield.

## The Problem:

SC2 doesn't let players specify their opponent's race. Therefore, players are unable to target their weaknesses during practice sessions.

## The Solution:

Bring players together for focused practice sessions based on relative skill and compatible practice needs.

## Players complete a questionnaire:

The database compares player data to identify viable practice pairs.

Django Database

Viable practice pairs are notified via email. They then connect with their SC2 usernames:
