Trigger Warnings You Selected

- a minor is sexualized
- alcohol abuse
- someone uses drugs

Technologies

Overview

- Systematically labels triggers in movies with AI.
- Users can track certain triggers to avoid.
- Users can search for specific movies within the database.

Results

Gemini neared sufficiently accurate results with some caveats:

- Inaccuracies when it came to non-human characters.
 - Movies must have their scripts available online for accurate analysis.
- Overall, Gemini recognized several triggers with relative nuance.
