

# Automated Job Application Tool

Nnaemeka Okonkwo

# 01

A Smarter Way to Apply for  
Jobs

# Vision

My Solution (So far):

- **Spring Boot Backend:** The engine powering it all, modular, scalable, ready to grow
- **Gmail Intelligence:** Filters through inbox noise to spot job-related emails automatically
- **LinkedIn Connection Checker:** Uses a scraping API to see if you and people at the company have shared history (alumni, ex-internships, mutuals)
- All working together to make job hunting less random and more strategic

# 02

Where We're Headed: From  
Smarter to Fully Automatic

# Coming Soon:

- Resume Parsing: Pulls your skills, experience, and projects automatically
- Job Matching Engine: Uses NLP to pair you with jobs that *actually* fit
- Auto-Fill Wizard: Enters your info into job apps so you don't have to
- Visual Tracker: A clean dashboard to see every app, deadline, and response
